Education

Georgia Institute of Technology, Atlanta, GA

August 2016 – Present

- Degree Pursued: Bachelor of Science in Computer Science
- GPA: 4.0

Expected Graduation: May 2020

Skills

- **Languages:** Python, Java, C#, C, JavaScript, HTML, CSS
- **Other:** Android, Spring, SQL Databases, REST, Bootstrap, AngularJS, jQuery, Node.js, PCF, AWS, GCP

Work Experience

CS 3510 (Design & Analysis of Algorithms) and CS 2050 (Discrete Math), Atlanta, GA January 2018 – Present

Teaching Assistant

- Lead recitation with Co-TAs to teach and reinforce concepts learned in class
- Hold office hours to help any students who have questions or are struggling to understand course material
- Grade homework and exams to provide feedback for students

First Data, Atlanta, GA

June 2018 – August 2018

Software Development Intern

- Created an application monitoring UI, giving developers quick access to important information regarding the status of applications. The monitoring application gets a list of apps from a Eureka service registry and pulls information from the Spring Boot Actuator endpoints of each registered application.
- Extended the metrics endpoint of Spring Boot Actuator applications to provide useful information about database connections.

Central Technology Services, Jefferson City, MO

May 2017 – August 2017

Software Development Intern

- Created a web application backed by a SQL database to store and manage properties that are used by the bank's mobile apps, allowing the apps to make API requests to retrieve the correct properties for the phones
- Updated the Android app to use Google Maps API v2, and refactored the app to reduce duplicate code and use Android's "Product Flavors" instead of separate projects for different app versions

Technology Services Organization Help Desk at Georgia Tech, Atlanta, GA

August 2016 – December 2017

Technical Assistant

- Assisted users with the operation of computer systems

Personal Projects

Playlist Generator

- Developed a website using Node.js Express to generate Spotify playlists based on one's music taste. July 2018

Reddit Bots

- Created a bot to notify users when a post for newly released music passes a certain upvote threshold on r/indieheads June 2018
- Developed a bot that summarizes comments or posts to a specified number of sentences. May 2018

GT Safe Walk Map

- Created a web application that shows a heat map of crimes on campus using GTPD's crime logs. It will also attempt to find the safest route from one point on campus to another. October 2017

Python Scripts

- Made a Twitter bot that finds album reviews and uses Markov chains to generate a brief review to put in a tweet. It also uses sentiment analysis on the original review to generate a review score based on its positivity. September 2017
- Wrote a script to email me every time Pitchfork gives an album the title of "Best New Music" April 2017
- Developed a script that will notify me once every 10 minutes if my VPN is off April 2017
- Created a script that logs into and scrapes websites that show the paper levels of printers where I worked, then updates a Google spreadsheet with how much paper each printer needs October 2016
